

Installing a skylight can *transform* interior spaces by increasing **NATURAL LIGHT**, and **ENERGY EFFICIENCY**, improves **VENTILATION** and adds **AESTHETIC APPEAL** to your **[CURRENTLY DULL]** space.

THE SKYLIGHT PROFESSIONALS

# COASTAL SKYLIGHTS are skylight installation specialists providing a fully customisable service – including skylight and ceiling opening design, installation and management of all trades required to fully complete your skylight.

## DID YOU KNOW?

A skylight or roof window can admit more than 3 times as much light as a vertical window of the same size.

We are an experienced team of roof plumbers and tradesmen located in the Coffs Harbour region with extensive knowledge of all forms of skylight products and the installation process including flashings used to ensure your skylight is watertight.

## 4 REASONS WHY YOU NEED A SKYLIGHT

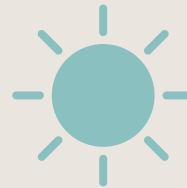

### INCREASED PROPERTY VALUE

The addition of skylights can increase the resale value of a home, as they are often seen as a desirable feature by potential buyers.

### AESTHETIC APPEAL

Skylights can add an attractive architectural element to a home, creating an interesting focal point and enhancing the overall aesthetic appeal of a space.

### NATURAL LIGHT

Skylights provide a source of natural light that improves the overall lighting of a space. Exposure to natural light has been linked to a range of health benefits, including improved mood and increased productivity.

### IMPROVED ENERGY EFFICIENCY

Skylights reduce the need for artificial lighting during the day, which reduces energy consumption and therefore lowers energy bills. Ventilated skylights help improve the energy efficiency of a home by reducing the need for artificial cooling and heating.
